Asbestos  
Removal &  
Remediation  
Services

## About us

With 25 years of experience in the industry, Caswell Group has established itself as a leading asbestos removal and remediation contractor in the UK. The company's ethos then, as it is today, is one of unrivalled quality of service and client satisfaction.

Founded by Carl Caswell in 1989 the family-run business has rapidly expanded and now boasts a truly national network of six offices and 200 staff, allowing us to cater to a diverse range of public and private sector clients.

At Caswell Group we have the expertise and capabilities to undertake asbestos removal and remediation projects of any nature and scale - anywhere in the UK. We understand that no two projects are the same, which is why our experienced and fully accredited team are dedicated to providing a bespoke service to meet your every requirement.

Our core values of delivering excellent results, within budget, safely and discreetly are at the heart of everything we do. We pride ourselves on being a forward thinking company that embraces innovation in the sector and uses the newest technologies and equipment available.

Caswell Group holds a full Health and Safety Executive (HSE) license to undertake work with asbestos. We are also current members of ARCA and ACAD.

Our portfolio includes plant operators in the oil and gas, power generation and chemical sectors, hospital trusts, universities, construction and refurbishment companies, local authorities and high profile commercial organisations.

For more information about our asbestos removal and remediation services and to read case studies from our clients visit:

## About Asbestos

- Asbestos was widely used as a heat-resistant building material and an electrical insulator within commercial buildings, homes and machinery from the 1950s until 1999, when it was banned. This means that asbestos is still present in millions of homes and buildings.
- Asbestos kills around 5,000 workers each year, which is more than the number of people killed on the road. Each week, around 20 tradespeople die as a result of past exposure to asbestos.
- When materials that contain asbestos are disturbed or damaged, they release dangerous fibres into the air. When inhaled these fibres can lead to serious diseases, such as mesothelioma, asbestosis, pleural thickening and asbestos-related lung cancer.
- Working directly with asbestos-containing materials (ACMs) can result in exposure to airborne asbestos that is much higher than normal environmental levels.
- The Control of Asbestos Regulations 2012 came into force on 6 April 2012, updating previous asbestos regulations.
- Asbestos removal is one of the most highly legislated services in the UK and an extremely specialised and skilled occupation. Asbestos removal should be carried out only by companies which are licensed and fully qualified to do so. There are penalties if you fail to appoint an organisation without the compulsory credentials.

For more information about asbestos from HSE please visit:  
[www.hse.gov.uk](http://www.hse.gov.uk).

## Asbestos removal sectors:

Due to the wealth of experience Caswell Group has gained during its 25 years at the forefront of the asbestos removal industry, the company is committed to offering a bespoke service to clients across all sectors.

As asbestos can be found in any building built before the year 2000, it is vitally important to employ a contractor with a high level of specialist knowledge in all areas, to protect the safety of those involved.

When working with Caswell Group, clients will feel confident that the work carried out will be specifically tailored to their exact needs, guaranteeing minimal disruption. The company will draw on its extensive knowledge of that particular environment to ensure the job is completed to the highest standard.

Throughout Caswell Group's history, it has worked in the commercial, healthcare, education, social housing, retail, construction and demolition, central government and leisure sectors – making the company a leading industry expert.

Here are some specific examples of the areas we have worked in:

**Commercial:** Major retailers, office buildings and banks.

**Healthcare:** NHS hospitals and trusts.

**Education:** Schools, colleges and universities.

**Residential:** Social and private housing.

**Central government:** Local authorities.

**Leisure:** Theatres and hotels.

Caswell Group can utilise its experience of asbestos decontamination and management in many different contexts and environments, to guide you through the current legal requirements and take care of any abatement work from investigative work to encapsulation, removal, decontamination and disposal.

With bases across England and Wales and more than 200 staff, we offer full national coverage. We manage all aspects of the asbestos decontamination process using only our own exceptionally qualified and highly trained personnel, all of whom are directly employed rather than sub-contractors.
