

Petroplus Refinery

Location: Waterston, Nr Milford Haven

Project Value:

Project Start Date:

Project Completion:

Project Information

The Petroplus refinery was Gulf's 115,000 barrel-per-day refinery near Milford Haven, Wales. The refinery was acquired by Petroplus from Chevron in 1998.

The complex comprises 1,550,000 cubic meters of storage capacity, deepwater jetties and a mothballed refinery including a cogeneration facility.

The refinery has been inactive for over a decade and purchased by an international oil company, to be shipped by boat to Pakistan for rebuild.

Caswell Group are currently working as an enabling works contractor employed directly by the Oil giant for the removal of asbestos pipe insulation and various contaminants prior to the dismantling and relocation contract.
